At **BYRON INSPIRED** we pride ourselves on sourcing and using only the highest quality ingredients available. After switching to Baobab Australia's 100% certified organic sustainable baobab, the superior quality of their product was immediately evident in the taste, texture and appearance of this exceptional baobab powder. The best we have found!

1. The colourlighter and creamier in appearance (possibly a reflection of freshness; the processing and packing protocol and an indicator of minimal oxidation and maximum vitamin C content).
2. The texture – finer, smoother, silkier, less granular.
3. The taste – delicate sweetly tart instead of sour.
4. Authenticity – backed by on site certifications and quality control.

Our customers reported an immediate and dramatic improvement in both efficacy and taste, resulting in a superior product profile. We're sold!
